

MACHARLA. OME VENKATA NAGARJUNA

+91 9121627633 ◇ Hyderabad ◇ mnagarjuna.dev@gmail.com ◇ [linkedin](#) ◇ [ovn-portfolio](#)

SUMMARY

Full Stack Software Engineer with 2+ years of experience building scalable web applications and solutions using React, Node.js, and modern JavaScript/TypeScript. Expertise in front-end architecture (Redux, Hooks) and back-end development (REST, GraphQL, Express). Proven analytical skills and attention to detail in designing, implementing, and deploying reliable products through best practices in clean coding and comprehensive testing (Jest, Cypress). Passionate about user experience, accessibility, SEO optimization, and problem-solving in growth-oriented startup environments. Strong technical background with continuous integration and DevOps implementation experience.

SKILLS

Front-End	React.JS, Next.JS, TypeScript, Redux, Hooks, HTML5, CSS3
Back-End	Node.js, Express, Python (Flask, Django), REST API, GraphQL, Web Services
Database	MongoDB, PostgreSQL, MySQL, NoSQL, Elasticsearch
DevOps	Docker, Jenkins, CI/CD, Git, Version Control, Yarn, Npm, Deployment
Cloud	AWS, Lambda, EC2, S3
Soft Skills	Analytical Skills, Problem Solving Skills, Collaboration, Communication, Attention to Detail

EXPERIENCE

Systems Engineer, Tata Consultancy Services	June 2023 - Current <i>Hyderabad</i>
---	---

- Designed and implemented scalable front-end architecture for 5+ web products using React.js with Hooks, state management, and multiple responsive UI components
- Developed comprehensive authentication systems with public and private route protection, ensuring secure user access and session management across applications
- Built and integrated numerous GraphQL APIs and resolvers using Node.js, implementing efficient data fetching and mutation operations for optimal performance
- Architected cloud infrastructure solutions using AWS services (S3, Lambda, EC2) with continuous integration pipelines and version control best practices

Software Development Engineer Intern Kasspro Enterprises	Dec 2022 - June 2023 <i>Chennai</i>
--	--

- Created accessible, SEO-friendly web interfaces with HTML5 and CSS3, user experience and responsive design
- Implement innovative features using React Hooks and Webpack bundling, following front-end best practices
- Applied analytical skills to solve performance problems in JavaScript applications, improving application efficiency
- Contributed to startup growth culture through rapid experimentation and technical problem solving
- Collaborate with development team to processes using version control and integration testing methodologies

PROJECTS

MERN STACK TASK MANAGEMENT APPLICATION

Technologies: React, Node.js, Express, MongoDB, GraphQL, Redis, Docker, CI/CD

Engineered full-stack task management application with GraphQL API and Redis caching for enhanced performance. Developed responsive React front-end with JWT authentication and role-based access control. Built scalable MongoDB database with optimized indexing strategies. Containerized application using Docker and implemented CI/CD pipeline with GitHub Actions. Applied analytical skills for database optimization, automated testing, and production deployment with comprehensive monitoring solutions.

EDUCATION

Bachelor of Mechanical Engineering, Godavari Institute of Engineering and Technology	2023
Relevant Coursework: Web Development (MERN Stack), Data Structures, Algorithms, Computer Science Fundamentals.
